"When you become totally empty, then only will you be fulfilled. When you are no more, then only for the first time will you be. You have to go through the process of identification. Don't get attached with things that are happening around you. Identification is the main problem. Identification is the main cause of suffering. And the identification with it, you have transcended. Transcendence is easily possible. Just change your point of view from the content to the context, from the mind to the space in which the mind exists."
